DIRECTOR'S MESSAGE

By letting your light shine, you help others fight their battles,
even without knowing it.

Dear Bosconians,

In the chaotic world that we are in, we should be the ones to bring rays of light. As the world is on a search party, in search of this precious gift - light, muscle power is in use, sophisticated technologies are in work, arms and ammunitions are employed, still, he is not able to find the true light that all of us need to have. In the last issue, we had identified some of the selfless ways to get this light shining namely, having a smiling face, being a friend to the one in need, sharing compliments for the efforts made, being friendly to every creature, and having passion and fire to do the same. Here, we shall look at some more selfless ways to shine our light.

06. Be Optimistic and Thankful

In every normal circumstance, when things do not happen the way they ought to, there would be hue and cry that lets the world know that things are not fine and chaos all around. Negativity would be the first feeling to strike in such circumstances and that would spread like wildfire too. Against such a background, when one is ready to show like Albert Einstein some positivity in the ruins, that becomes the key and that is optimism. That may also turn out to be something that someone else may have been searching for at that given point of time. Therefore, one really has to decide to focus on optimism and thankfulness to change the mindset of others to spread this light. So, the challenge remains to be the kind of person that chooses to see silver linings in difficult circumstances.

07. Be Generous

The world is on to a mania of collecting and gathering even if not required. The status in society also seems to be depending upon the number of possessions one has. To this current when one opts to go against it by being generous with one's own time, talents, possessions, and other things, that turns out to be a beacon of light. Generosity may be with the unfit clothes that one had been using, maybe a willingness to listen to the cries of the other, can be a decision to walk an additional mile with the other, and so on. It is not always related to money. It is more of a habit that one has to cultivate to be generous in society.

08. Be an Active Listener

It is a rare item that is available in the world today. Active and involved listeners are very few to count on. The one who has lots of problems looks out for some listening ears to unload their worries and anxieties. Most of the time than otherwise they may not be even expecting a reply instead want someone who can just listen to them and feel with them for the pain that they are undergoing. But it demands sacrifice from the one who is daring to listen. Many at a times it is noticed that listeners begin to search for answers while the problems get unfolded and in the process details of the problems may be lost or overlooked. So, it has to be a consolidated effort from the side of the listener to be completely at the task.

09. Be an Empathiser

Often empathy gets mixed up with sympathy. While sympathy is a feeling for the other, empathy is putting yourself into the shoes of the other. In order to show empathy, one has to be really selfless. While being empathetic, one becomes a beam of light as is the case with whom empathy has been shown. By doing so, one also shows to the other that they are not alone in the struggle but there are also others who are traveling along. And that is the feeling worth going with.

Conclusion

Being a light to the other is the best thing that one can do as it shows one's own heart and soul. When one has a pure and kind soul, it becomes part and parcel of that individual to give others the hope and love they deserve. Through one's heart, one can challenge others to be someone who is selfless to a point of not expecting anything in return. In fact, one's own radiance and light are the reasons why others are drawn toward you.

JOURNEY THAT CHANGED MY LIFE

“Life is not about waiting for a storm to pass but learning to dance in rain”

Like any other student, I too thought of completing the graduation, go for higher studies, get a stable job and settle. But God had other plans for me, he wanted me not just to be a bookworm but be where I belong to and he wanted me to be in DBTI as a designer. So it all started when the pandemic was going on, and colleges were having Open Book Examination. During this I just finished my 3rd year examination and was planning to apply for my further studies but I was confused as to whether I should do it or not. At that time someone suggested that I enroll myself in DBTI along with my brother and I did that. I went for an interview, got admission in DBTI and soon online classes started. We got to know our Class Teacher Manoj sir, Mahesh Sir and Br. Mathew, our subject teachers as well as our classmates, learn new things about designing both practical and theoretical.

After three months of Online classes, I finally had our first Offline classes in the month of November. My first day was full of new experiences, a new atmosphere, new friends, and a new journey. Learning something new is rather difficult but exciting too. Every week we learnt new things from the teachers. Anyone who comes to DBTI will learn not only designing, coding, technical things but also how to live a disciplined life too.

Six months had passed like this and I had come a long way to where I can say I became someone I always dreamt to be. But again on account of the pandemic, DBTI was shut again but that was not the end but a new beginning for me, that's why I kept on learning, practising and improving my skills and cleared my exams. All this resulted in where I am right now, I am working in a Christian Educational Institution as an Office Secretary and Graphic designer too. It's been seven months now since I started working there and have a good response from them just because of DBTI where not only teachers but also my fellow classmates encouraged me and made me what I am today.

I was so fortunate to get an opportunity to study in DBTI and I also thank everyone for playing a vital role in my journey.

Alma Xalxo, Past Pupil

A MEGA WASTE-TO-ART EXHIBITION

The World Environment Day 2022 global campaign #OnlyOneEarth calls for transformative changes to policies and choices to enable cleaner, greener, and sustainable living in harmony with nature. It focuses on the need to live sustainably in harmony with nature, and our possibilities for shifting to a greener lifestyle through both policies and individual choices.

Keeping in mind the global campaign 'OnlyOneEarth', MCD Central Zone organized Mega Waste-to-art Workshop & Exhibition to commemorate World Environment Day & Azadi Ka Amrit Mahotsav at Don Bosco Technical Institute on June 7, 2022. The program began at 11:00 AM. Deputy Commissioner Mr. Danish Ashraf, IAS, was the chief guest on this occasion of Mega Waste-to-art Workshop and Exhibition.

A number of MCD school children and students from Don Bosco took active part in the exhibition. The chief guest and all the participants were welcomed by Dr. Fr. Sajan M George, the Executive Director of Don Bosco. There were two Nukad Nataks presented by BCA students of Don Bosco and SDMC school children which gave an important message to take care of the earthly ambient in which we all live. The Chief Guest went around visiting and interacting with the children and students who prepared various useful articles made out of waste materials. Certificates of Appreciation were awarded to amateur participants from MCD schools, DBTI and professional artists from Lalit Kala Academy for their unique Waste-to-art creation of artefacts.

MCD Central Zone DC Mr. Danish Ashraf addressed the packed audience and complimented the participants for their innovation in bringing out various useful articles made out of Waste to uphold the principle of 3Rs.

MCD ADE Mr. Dev Nath Mahto too was appreciative of the effort made by the students to celebrate the day in a fitting manner. The program concluded at 12:40 PM with snacks for all those who were present. DDSIL IEC Head, Mr. Subhash Gautam was the Master of Ceremony. He coordinated the entire program very well indeed and at the end he thanked everyone for the cooperation and collaboration of everyone present.

OLA ELECTRIC SCOOTER TRAINING

Everyone knows the developments that are being taking place regarding Ola electric scooter for quite some time. The scooter E2W was revealed via its first official pictures in March 2021 and it is already launched in the Indian market.

Its speed, range, manoeuvrability, ride & handling, and of course its design, and the incredible technology packed into this - all make it a game-changing vehicle and a beauty to drive. The Ola vehicle engineering team has been testing the Ola Electric Scooter extensively since last year.

The Ola team felt the need of starting a training center in Delhi and so Ola Electric scooter training (servicing and maintenance) begun at Don Bosco Technical Institute, Okhla on 10th May 2022 with a short inaugural ceremony in the presence of Fr. Sajan M George, the Director of the Institute, Br. Tom C. J, the Principal and Br. Cyriac, the administrator and Mr Seemant Kumar and Mr Ashish Kumar representing Ola. Seventeen trainees were present on the opening day. Fr. Sajan M George, welcomed everyone and told the importance of getting the right training for an efficient service.

The Ola team had dispatched the scooters along with the tools & chargers, stationery to the institute prior to the training and the coordinating committee set up the tools and equipment together with all the necessary training facilities. By June end eight batches were trained. Each batch had a duration of four to seven days. Mr. Ashish Kumar is the trainer and he is committed and efficient. I am sure under his guidance many more will be benefited in the coming months and years.

MY JOURNEY TO DBTI

"If you are not willing to learn, no one can help you, but if you are determined to learn, no one can STOP you". Hello, my name is Beena Tirkey and I am from Jharkhand. I am happy to share my thoughts and experiences with you all. During the COVID-19 pandemic in 2021, I gave my PG final exam and the result was unduly delayed. I did not know how to make use this time. Then

my family members suggested me to do a Computer Course. Since we were already aware of DBTI, we contacted Fr. Abhay and enquired about the admission.

He then talked to the principal who said that admission would be done. Then I moved from Jharkhand to Delhi.

I came to the institute to complete my admission formalities and I got my admission in COPA Trade. I met at the reception Rosleen Ma'am whose sweet voice and loving words touched my heart. On account of the pandemic, classes had begin online at first. Offline classes started after a few days and that was my first day in the institute and I found that all the students seemed to be happy. Gradually I too had good friendship with many people. Coming to this institute reminded me a lot of memories like standing in line for assembly, diary in hand, Identity Card, etc. I felt like I'm back in school after college but all these things taught us to be disciplined and build good character for the future; that is why it is said that "Character building is the ultimate aim of education". During the assembly I used to hear short stories from the Principal, Br. Tom, Rector, Fr. Sajan, and Fr. Abhay, which benefitted me a lot in my life.

Principal Br. Tom is a very helpful and supportive person. Fr. Abhay was strict with the students. He demanded discipline so that students might learn the art of living and dealing with people which eventually make them successfull in life. Rector, Fr. Sajan is such a happy person that on seeing him a smile automatically comes on our face. This institute taught me a lot through many activities which gave me self-confidence, zeal and passion to proceed in life.

I got placement during my studies in DBTI and it is a matter of great pleasure for me. And every teacher has contributed in my growth especially Amit Sir who is my class teacher, who spent additional time to teach me because I was late for admission. Thank you dear teachers for guiding me, inspiring me and making me what I am today. Once again thank you all from the bottom of my heart for your love, support and encouragement. Overall my experience is really good in DON BOSCO TECHNICAL INSTITUTE and I shall cherish the same for a long time to come.

Beena Tirkey, COPA

DAYS TO CHERISH

Hello, I am John Tirkey and I have just completed one year graphic design course at DBTI. I am from Prayagraj, U.P, and I had completed my education till class XII from St. Joseph's College, Prayagraj. Due to Covid-19 our classes started late in DBTI, Okhla. Online classes started from 16th September 2021 onwards and in the following month, our offline classes started. I stayed in the hostel and it

was first time that I stayed away from home and I was a bit nervous about the new environment and people. As soon as I entered the institute, I was amazed by the splendid greenery and the tall buildings of the institute. The reception was located at the entrance. The receptionist, Mrs. Roseleen Gomes has a polite way of speaking with parents and students. Our class teacher Mr. Manoj is also a kind and humble person and he made sure that all the concepts of the theory and practical were made clear to all the students and he used to give attention to all the students, especially the weaker ones. Br. Mathew who is our GD theory and practical teacher made sure that students understood the subject deeply so that later on students could give their best service to the company in which they would be working.

Besides our studies, we also get some extracurricular activities like photography and making short film which helped me to broaden my horizon. DBTI provides opportunity to the students so that they can showcase their talents. Recently, we were given an assignment by Br. Mathew to make a short film. Students were being divided into groups so that they could learn to work and coordinate in group. Each group gave it's best and each member played an important role.

It was a bit difficult for me to stay in the hostel as I knew that I would be missing my family and friends and I would have to follow strict rules and time table of the hostel. Fr. Abhay, the hostel warden, used to say that if one could manage to stay in the hostel he could survive anywhere in the world in any given situation. The time table of the hostel helped me to manage time and make me realize the importance of time. Father also emphasised everyone to speak in English so that we could develop our vocabulary skills. Co-curricular activities helped me to mould my mind to do productive activities. At last I would like to say that I had a wonderful experience in DBTI and I will always cherish the days spent in DBTI.

John Tirkey, GD One Year

JUST FOR YOU

Robert and David played several golf matches against each other in a week. They played for a pizza at each match, but no pizzas were purchased until the end of the week. If Robert and David had the same number of wins at any time, those pizzas were canceled. Robert won four matches (but no pizzas), and David won three pizzas. How many rounds of golf were played?

Do you know actual full form of the following?

Newspaper	= North East West South past and present events report.
Chess	= Camel, Horse, Elephant, Soldiers.
Cold	= Chronic Obstructive Lung Disease.

JOB FAIR CUM EXHIBITION

Job fairs are events where you can discover jobs that you did not know existed. The event allows you to learn the skills you need for specific positions. Employers can also learn more about your skills and establish how you could fit in with their organization.

Job fairs can be large or small gatherings. Organisers set up booths for different companies in one centralized neutral venue. Employers or recruiters stay at their booth and candidates go from booth to booth to interact with recruiters. Many employers set up their own booths for hiring individuals. During the event, candidates can ask the recruiters about their organizational culture and the application process. Many job fairs offer on-the-spot interviews where candidates secure employment instantly. Some of the benefits that candidates can get from attending a job fair are: They can find internships or future full-time opportunities. They can personally meet the employers. They can talk to other professionals and improve their professional network. They can get immediate responses from many companies at the event.

The job fair organized at DBTI, Okhla on 25th June 2022 was significant as many candidates in and around Delhi were eager to attend interview so as to get a job. The placement coordinator Mr. Keith and his team did an excellent job by way of planning a month in advance to benefit as many youngsters as possible. The registration process of the day begun at 9:00 AM and candidates in big numbers started following in to the campus. About 25 trainees together with the teachers did a marvellous job by volunteering to make the day's program smooth and hustle free. At 10:00 AM we had a small inauguration ceremony to welcome the HRs and the candidates as well. After the introduction by Mr Keith, there was lighting of the lamp after which Dr. Fr. Sajan M George, the Director of the institute welcomed everyone and wished them all the very best for the interview and employment thereafter. There were HRs representing eleven companies Over all 330 candidates turned up for the interview and 165 of them were selected.

Together with the job fair, there was also a mini exhibition in which some of the products produced by the trainees were displayed. There was lot of attraction at the exhibition and the volunteers were explaining the details to the visitors. The day's program came to an end at 4:00 PM.

The selected candidates will be happy indeed as they will be looking forward to join duty soon. Those did not get through may be disappointed a bit but this interview was an experience which will have prepared them for better performance whenever their chance comes next.

Graphic Design

In a society that's hurrying all the time, visuals play a huge role in transmitting a message and communicating something faster.

Graphic design is something that could entirely change the game. For companies, regular people, and institutions, graphic design can be the one element that changes how these are all perceived. Since it is a creative industry, graphic design offers people the possibility to express themselves uniquely. To become graphic designers, we need to have passion and creative minds.

DBTI has a graphic designing training program for one year as well as for 2 years Which is affiliated to ICSE board which issues a certificate equivalent to Class 12. After the two years of training, the students are capable of doing quality design jobs. They have the option of higher studies as well. During one year of the training program students are taught designing software, such as Adobe Photoshop, Illustrator, InDesign, After effects, Premier, and CorelDRAW. They are also updated with design theories and 3D Modelling and Visual Creativity. The students of one-year course are generally employed in well-known companies as graphic designers.

HEALTH CHECKUP CAMP

AT DON BOSCO OKHLA

Everyone is aware and knows well that when it comes to general health, prevention of an illness is better than the cure of the same. While in many cases, the oncoming of a condition of disease is not well in our control, there are many situations, where if proper precautions are taken, can lead to the minimization of risks involved. And this is where a general health checkup comes into play.

A health camp was organized for the trainees of DBTI by National CSR Network. NCN is an initiative of Strategic CSR Alliance set up in 2015, with the vision to empower companies for meaningful social development. NCN, being an industry led and managed organization, has emerged as a significant development sector platform in India. It has successfully brought together Corporates, NGOs and Government agencies to forge CSR partnerships for greater impact. It is chaired by Mr. Dwarakanath, Former Chairman, GSK India.

The trainees of DBTI were privileged to have doctors from MAX Multi Speciality Center, Panchsheel Park, for the health checkup. Blood pressure, blood sugar and eye checkup were done for about 200 students of the institute. A handful of students had slight sugar problem while some others had Blood Pressure a little on the higher side. Some were diagnosed with vision problem. Those who required spectacles were promised discount on the purchase of glasses. The program started at 10:30 AM and ended at 4:00 PM. The organizers also promised to give guest lectures to the students on health issues. At the end of the day the organizing team felt contented with the service rendered to the students as many took advantage of the health checkup provided. The institute management is grateful to the team of organizers and doctors who spent their valuable time.

**Br. Tom C. J.
Principal**

GROUP VISITS

DBTI Okhla was privileged to have visits from various groups in view of promoting admissions for the coming year as the admission process is on since May 2022. Mr. Satyajit Ghosh representing Plan India had organized a visit for a group of boys and girls on 18th May in the morning.

A group mostly consisting of girls from Shaheenbagh had come in the afternoon on 18th May 2022 to visit the institute under the leadership of Mr. Imtyaz Ahmad who is representing IFRAH. Both the groups were given a briefing on the institute and its training programs and later on they were taken to see the training facilities of the different sections; Mechanical, Computer, Printing and Graphic Design. They were happy to see the facilities and interacted with the trainees as well.

A group of officials from NITI Ayog's Training and placement department had come for a visit on 6th May to see the training facilities. They had asked us to brief them on the challenges with regard to the grading as well as some of the concerns for running an ITI.

GIRLS FROM SHAHEENBAGH

PLAN INDIA GROUP

MOCK INTERVIEW

A mock interview is a simulation of an actual conversation with a human resource specialist for the desired job position. The critical difference is that the participant would not only train the skill of participating in job interviews but also receive feedback and advice on what needs improvement.

THERE ARE SOME TIPS FOR YOU HERE BELOW:

1. Find out as much as possible about the company and the job position you are aiming to receive.
2. Confirm with the recruiter whether you need to bring a printed portfolio, resume, or a laptop for a test task, if applicable.
3. Prepare answers to frequently asked questions
4. Remember to prepare questions for the employer. Think carefully about what is essential for you to find out in advance, such as training opportunities, career growth prospects, corporate culture, and internal rules.
5. Take care of yourself. Have enough rest before the interview, select an attire that fits the dress code and boosts your confidence.

When researching what is a mock interview and preparing for the experience, don't forget to try to ease your stress. This shouldn't be a scary experience. Rather, it is an excellent opportunity to learn and receive feedback.

DBTI had mock interviews for Mechanical, Computer and Graphic Design sections on different days. And some industry experts were called for the same. It was an experience which really prepared them for interview. Their confidence got a boost and they knew the knowhow of facing an interview.

MECHANICAL DEPARTMENT

THE CHESS BOARD PROJECT

In search of an idea for an innovative project for the 2nd year trainees, one day our CNC Teacher Mr. Deepak gave a cylindrical piece each to each one of us. He put us into a brain storming session. There were many ideas and suggestions but the most conspicuous was the idea of making a chess board with mild steel. Everyone felt happy about the idea and accepted the project. The project was discussed with our Principal, Br. Tom C.J. and he gave the green signal immediately. At first we were on the drawing board to give some clarity on how to go about and then the project was programmed on the CNC machine. Extra care was taken to see that the size of the chess board was same as that of a standard chess board. There were some challenges while executing the project on the CNC machine but Deepak sir was always there to give timely direction. The base of the chess board was machined on milling machine with the assistance of Shiv Kumar Sir. There are 16 trainees in the second year and everyone contributed to the successful completion of the project.

While the project was going on, a video recording too was done from time to time to create a documentary. Everyone had a sense of satisfaction and joy when the machining was completed and the pieces were ready to be placed on the base. The chess board looks original with good finish and it is placed in a glass case for display. The documentary too came out well giving the details of the project at different stages. There were lot of encouragements and appreciation from different sections of people. In fact, we were asked to prepare more of the same as some people liked it very much. We feel that preparation of this unique model took us to a higher level of learning with regard to CNC programming and operations. We express our gratitude to our Principal Br. Tom and the teachers who supported and encouraged us to achieve this milestone.

Jaijit, on behalf of 2nd year Machinist 2021-22

ADIEU! BCA 2019-22 BATCH

“Every new beginning comes from some other beginning’s end.”

In an emotionally charged atmosphere inside the campus of Bosco Technical Training Society, Don Bosco Technical School, Delhi, the students, staff, and management of the BTTS bid adieu to the Students of 2019-2022 Batch at a grand farewell function on 21st May 2022. The main objective of the farewell function was to bid a cheerful adieu to the students passing out this year and to strengthen the bond between the juniors & seniors. Nirbhay Ranjan Mishra, an analyst at Deloitte who specialized in AI automation and Cloudcomputing, was our special guest for the day.

The celebration started around 10:15 AM at the Don Bosco Auditorium with a warm welcome extended to all the dignitaries, guests, faculty members and students. This was followed by the lighting of the lamp by Rev Dr. Sajan M. George, Br. C.J. Tom, Br. Cyriac Kurias, Dr. Vikas Rao Vadi and Mr. and Ms. Brand Ambassdor 2022 of Don Bosco, Mr. Abhishek Bhardwaj and Ms. Bhawna Sharma. Then there was a message by Rev. Dr. Sajan M. George, Executive Director, DBIT. He extended his heartiest wishes and blessings to the 3rd year students for their bright future. Dr. Vikas Rao Vadi (Director, GGSIPU Courses) advised the students to cultivate a positive thinking and do smart work in order to become successful in their career. Our special guest, Mr. Nirbhay Ranjan Mishra, motivated students by sharing his experience.

The event was colored by varitey of cultural performances. One of the highlights of the event was a video presentation prepared by the juniors for seniors and it had a lot of fun as it consisted of memories of seniors which made everyone mushy.

Token of love and appreciation was given to the students by the department during the Memento presentation ceremony. It was an entertaining as well as memorable farewell function which everyone will cherish. In recognition of their three-year journey, the following awards were given:

Stand out performer: Mr Manish Kumar	Behind the seen aware: Mr. Mayank Yadav
Pinnacle Performer: Mr. Hamood Siddiqui	Mr. Don Bosco: Mr Abhinandan Pandey
Artistic Award: Ms. Mandeep Kaur	Ms. Don Bosco: Ms. AasthaThapa
Alpha player award: Mr. Neeraj Purohit	

~ Deepika Kirti, Asst. Professor

A GOLDEN OPPORTUNITY

On 7th February 2022 when I was working in my office, there was a phone call from none other than Br. Tom, Principal of Don Bosco Technical Institute, Okhla. I had sent my CV earlier and after going through the same, he offered me a post as a teacher in DBTI and I accepted his offer with a heart full of joy. For me I consider it as a big opportunity to teach at the age of 22 years. On 8th

February 2022 I was called for an interview and I was selected as an instructor as I had done Craft Instructor's Training Scheme (CITS) which is mandatory for an ITI instructor. I was very excited over my selection. My actual journey in DBTI started on 9th February when I started instructing as a Draughtsman instructor. That day was a big moment for me. It was a golden opportunity and I was very excited on my first day of teaching in DBTI.

Here I find the infrastructure, rules and regulations good for the students to learn and all the staff members are very good and very co-operative. I got much support from the principal and staff. They always guide me whenever I approach them. While teaching the students I received a lot of appreciation and respect from the students. Here I found a very good understanding among the staff members as well as from the Principal. I also got a lot of support from my family members. I told them many things about Don Bosco Technical Institute. They are very happy that I am working in DBTI.

DBTI is very far from my house in fact. I set out from home at five in the morning every day as I need to travel quite a long distance to reach DBTI on time. While going back after four in the evening I reach my house around 8:00 PM. In spite of this travel difficulties I have made up my mind to continue and enjoy my teaching as an instructor in DBTI. As I said earlier it is a golden opportunity to teach in DBTI. Earlier I had heard a lot about the infrastructure over here. I have completed four months of teaching and I try to give my 100% to my students and the institute as well. Whatever the institute asks me to do I will try my best to fulfill the aspirations of the Institute. I do experience a sense of joy and satisfaction working in Don Bosco Technical Institute.

Deepak Saini, Draughtsman Instructor

DBTI'S CNC TRAINING CAPABILITIES

The time I spent in Don Bosco Technical Institute is remarkable and I liked it indeed because of the training infrastructure as well as the atmosphere. The experience is totally different from that of the school days because of the set up and an ambient which is conducive for a qualitative and professional learning. I was fortunate to be a student of one of the most reputed institutes in Delhi. The campus which is of about ten acres is well laid out with lot of trees, playgrounds, flower gardens and lawns. The institute offers a variety of courses in Computer, Mechanical, Printing and Graphic Design.

I am a student of Malvya Nagar ITI and I took admission in CNC (Computerized and Numerically Controlled), a part time course which my group attended on Saturdays, Sundays and other holidays. Initially I was a bit scared as everything was new to me. But slowly the life changed and I felt everything very homely. Mr. Deepak Raja, my CNC teacher, and other friends played a vital role in completing my training successfully. The process followed for the training was that initially we had fine tuning of Auto CAD followed by practice on simulators and finally operation of CNC production machines.

I feel it a dream come true as I completed my course on 12th June 2022. On the last day of the training we expressed our gratitude to Br. Tom C J, the Principal and Mr. Deepak Raja, the trainer. Both of them had words of appreciation and encouragement for us and they wished the group success and a bright future. I am confident that twenty of my friends and I will find a suitable job with handsome salary soon because of the CNC training we have received from Don Bosco Technical Institute. I wish that many more students come to know Don Bosco, its training capabilities and take advantage of the facilities offered.

Vivek Kumar, Malvya Nagar ITI

Trainees from Malvya Nagar and Narela ITI Completed CNC in (June 2022)

RECOGNITION AND APPRECIATION

RECOGNITION DAY is organized to acknowledge and appreciate those who have performed with outstanding efforts in competitions, studies and other activities. DBTI do recognize and admire the performers of the year. The spirit with which some of the trainees performed and the professionalism shown have immensely motivated the entire management.

We pride ourselves on their hard work and dedication thus showing the way to success to their friends. As always, we are counting on them to go the extra mile wherever they will be in the future. We are proud to have enthusiastic students studying in DBTI. I am sure that they will keep up the standard with which they are moving into the future.

DBTI Management, Staff and Student gathered on 30th June 2022 to acknowledge and appreciate the trainees who performed well during the course of the year. It was also a day when the institute bid farewell to the outgoing trainees. The program of the day begun at 1.00 p m with the lighting of the lamp and prayer dance after which Dr. Fr. Sajan M George, the Director of the institute welcomed the chief guest. He, in his message emphasized on the importance of focussing on the future with right motivation and accepting the failures as stepping stones to success. There were several well prepared dances and songs during the program. Abhishek, one of the first year trainees in his address wished the outgoing trainees all the very best.

Those with 100% attendance, the tournament and competition winners and those first in the class and sections were awarded with trophies and certificates. Anuj Pawan Ekka, Samya Chaudhary and Ashish Bage were declared as the best trainees of Mechanical, Computer and printing sections respectively. It was a thrill indeed for Anuj Pawan Ekka of 2nd year Draughtsman who was declared as the best trainee of the year. Anuj on behalf of the outgoing trainees expressed his gratitude to the management, staff and the trainees of first year for the wonderful experience that they experienced and enjoyed during the course of the training. The Chief Guest appreciated Don Bosco Management for the effort being done to skill the youth. He also told the trainees to be employable in the job market and at the same time be entrepreneurs to be successful in the future. Br. Tom, the Principal of the institute gave the vote of thanks and in his concluding message he told the trainees to respect those who show the way especially the parents and the teachers. He also told them that knowledge, skill and right attitude are very important whatever job is undertaken in the future. Kudos to Fr. Abhay, some of the teachers and some of the trainees especially the hostel boys who did a marvellous job to prepare the items as well as to prepare the stage in an attractive way.

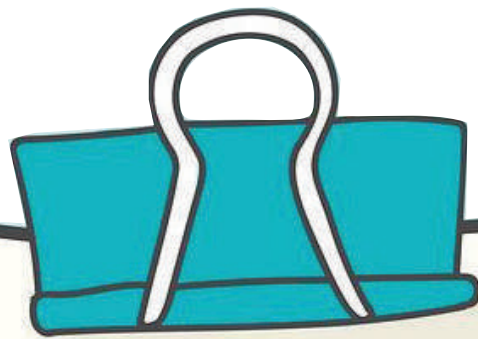

During the program a video documentary of the chess board project was played. It was prepared by the mechanical trainees and the project was appreciated by many. At the end of the program another video clip was played and the some of the cherishing moments were displayed in the same. After the program everyone had delicious snacks after which some of the students stayed back to dance and enjoy for a couple of hours. I am sure it was a day to cherish indeed for most of the students of the institute.

Br. Tom C. J.
Principal

RECOGNITION DAY

DBTI UPDATES

24th to 28th March: Quarterly examinations

24th March: Two representatives Ms Ausua Ghosh and Areesha Fatma from MSDE visited DBTI in view training and collaboration.

MECHANICAL		
COURSE DURATION: 2 YEARS		
COURSE/TRADE	CERTIFICATION	ELIGIBILITY
Draughtsman	NCVT	Class X or Equivalent with Maths & Science with Minimum 45% in Mathematics for General Students & 35% in Mathematics for Christian minorities & ST/OBC. Students should have sufficient knowledge of English
Machinist	NCVT	
Machinist Grinder	NCVT	
Turner	NCVT	

COURSE DURATION: 2 YEAR		
COURSE/TRADE	CERTIFICATION	ELIGIBILITY
General Machine Operator	Don Bosco	Class VIII

PRINTING		
COURSE DURATION: 2 YEARS		
COURSE/TRADE	CERTIFICATION	ELIGIBILITY
Offset Printing Technician (CVE)	CISCE	Class X Pass in one sitting with 40% Marks in English, Maths, Science
Graphic Design Technician (CVE)	CISCE	

COURSE DURATION: 1 YEAR		
COURSE/TRADE	CERTIFICATION	ELIGIBILITY
Offset Printing	Don Bosco	Class VIII
Graphic Design and Multimedia	Don Bosco	Class XII Pass in one sitting with 40% Marks in English and Basic knowledge of Computer

COMPUTER		
COURSE DURATION: 1 YEAR		
COURSE/TRADE	CERTIFICATION	ELIGIBILITY
Computer Operator & Programming Assistant (COPA)	NCVT	Class X under 10+2 System and proficiency in English
Computer Hardware & Networking	Don Bosco	Class XII and proficiency in English

BCA		
COURSE DURATION: 3 YEARS		
COURSE/TRADE	CERTIFICATION	ELIGIBILITY
BCA (Bachelor of Computer Applications)	Guru Gobind Singh Indraprastha University	Class XII

SHORT TERM COURSES		
COURSE/TRADE	CERTIFICATION	ELIGIBILITY
CNC Milling	3 Months	Degree/Diploma/ITI. Mech Trades or Person working industry
CNC Turning	3 Months	
Refrigeration & Air Conditioning	3 Months	Class X
Electrician	3 Months	Class X
Plumbing	3 Months	Class X
Advance Welding	3 Months	Class X

Issue of Form
JUNE - JULY

Counselling/ Test and Interview
JULY - AUGUST

Commencement of classes
AUGUST/SEPTEMBER

GOD'S GOODNESS

FROM THE CHIEF EDITOR

John D Rockefeller was once the richest man in the world. At the age of 25, he controlled one of the largest oil refineries in the US. At 31, he had become the world's largest oil refiner. By age 38, he commanded 90% of the oil refined in the U.S. By 50, he was the richest man in the country. As a young man, every decision, attitude, and relationship was tailored to create his personal power and wealth.

But at the age of 53, he became ill. His entire body became racked with pain and he lost practically all his hair. In complete agony, the world's only billionaire could buy anything he wanted, but he could only digest soup and crackers. An associate wrote, 'He could not sleep, would not smile and nothing in life meant anything to him'. His personal, highly skilled physicians predicted he would die within a year. That year passed agonizingly slowly.

As he approached death he awoke one morning with the vague realisation of not being able to take any of his wealth with him into the next world. The man who could control the business world suddenly realized he was not in control of his own life. He was left with a choice.

He called his attorneys, accountants, and managers and announced that he wanted to channel his assets to hospitals, research, and charity work. John D. Rockefeller established his Foundation. This new direction eventually led to the discovery of penicillin, cures for malaria, tuberculosis and diphtheria.

But perhaps the most amazing part of Rockefeller's story is that the moment he began to give back a portion of all that he had earned, his body's chemistry was altered so significantly that he got better. It looked as if he would die at 53 but he lived to be 98. Rockefeller learned gratitude and gave back the vast majority of his wealth. Doing so made him whole. It is one thing to be healed. It is another to be made whole.

Before his death, he wrote this in his dairy, "The Supreme Energy taught me, that everything belongs to him, and I am only a channel to comply with his wishes. My life has been one long, happy holiday; full of work and full of play I dropped the worry on the way and God was good to me every day."
