“LOVE WHAT YOU DO, DO WHAT YOU LOVE” - WAYNE W. DYER

DEAR BOSCONIANS,

It is a common question that comes into the mind of everyone, including each of you, “How can I do what I love and love what I do?” When one does what one loves, there comes a good feeling along with such activities. And that is something that can’t be measured or calculated. It can only be experienced. To begin with, if you are an ambitious student, obviously your effort will be to see that you spend the maximum time towards your studies. It may be in the early hours of the morning or it may be late into the night. It hardly matters still one is ready to get into one’s own books to secure that additional bit of knowledge. When you love what you do, it is not a must that every time you wake up you are doing so with a smile on your face. Still, you go on to study, for that is the fire that is burning in you.

Securing a dream job will make anyone jump out with joy irrespective of the state of the body that one is in. There are no grudges or unwillingness shown out here to escape the same. Instead, the work that you are at makes you completely at it fully engaged and immersed. That is an exciting start. But it does not happen just by chance, it is a result of constant effort.

How does it feel to love what you do?

It is an obvious fact that when one has to do something that one does not like, it is a herculean task. It will have its showing all over. Things will not go well. Satisfaction of doing the work will never be around. The happiness of accomplishing something will be a far-forgotten conclusion. Basically, what one looks forward to will only be how can that time be spent. Hours of work automatically look too long and not passing. On the contrary, if one is doing something that one loves the most, there comes a feeling of satisfaction, joy, and fulfillment. Attitude towards the task changes and one begins to enjoy every bit of the task that is at hand. Herein, one does not realize how time elapses. One gives one’s best and that turns out to be the moment of greatness for oneself.

In this scenario, new initiatives, new ways of addressing issues, new development, and newness to the organization emerge. The sky becomes the limit and every available opportunity will be grabbed with both hands and more and more new opportunities will be looked for. An environment of excitement comes into the atmosphere. It is also contagious and attractive. Like a drop of honey, such attitudes will attract minds of similar nature. One becomes passionate about what one has to do and one does not shy away from showcasing what one has achieved with the dream yet to be realized. This not only turns out to be a positive energy for oneself, but one turns out to be a motivating livewire for others wherein one's passion and drive are irresistible.

It is to be noted that those who do what they love are people who are much of relaxed with less level of stress and emotional outburst. They are able to bring the necessary calmness and composure into what one has to do. Thus, it becomes a capsule that drives away negative thinking and brings in more positivity to what one has to do and, in the outlook, one has.

Why do what one loves

Everyone deserves to do things in life that they love to do. To look at it from another way, what is the use of going on doing things that do not make one feel passionate, interested, or fulfilled? For, a meaningful life always exudes passion, values, and love. To add to this:

When one pursues one's passion, one will be more fulfilled in one's personal and professional life

One will be more productive as one's moral to do will be high

One will feel to do more as one's own result will be the motivating factor for better performance thus making one even a role model for others

One will have more of an open heart and a strong will to look for new things since the heart is desiring for more to expand one's skill, ability, and knowledge

One will always be willing to give one's best as work does not become any more a burden to oneself

As I take a pause here, in the coming issue we shall look forward to understand the theme 'learning how to find the things one loves to do'.

To be Contd...

Rev. Dr. Sajan M. George sdb
Executive Director, DBTI, Okhla

FROM THE CHIEF EDITOR'S DESK

It is little more than a couple of months since we all have walked into another new year. I am sure we all have left behind all the negative experiences and failures of the past year but at the same time drew strength from all the positive experiences which touched our hearts and made us more confident and competent. We have built and took ourselves forward from those life enriching experiences. Renewed vigour and energy at the beginning of the new year should help us to move forward with right attitude and enthusiasm.

There must be a deliberate and meticulous planning to achieve success in life. If you look back, you will see successes and failures in spite of hard work and effort. One must be happy with the successes and at the same time failures are to be considered as stepping stones to success. It is good to take a moment to think of all the steps you take to accomplish your goal.

Set specific goals. Without specificity, you do not know what you are reaching for or when you have achieved your goal. A specific goal makes it easier to plan the objectives you need to reach in order to achieve it.

Develop goals that can be measured. If a goal cannot be measured, it is impossible to monitor how well you are doing in reaching your goal. Measurable goals ensure that your overall plans and projects remain on target through the year.

Implement goals that are attainable. It is important that the goals you set can actually be reached based on the resources available with you be it material or intellectual.

Establish relevancy when planning and setting goals. The goals will focus on areas that are important and will have a great impact on the overall direction that takes you forward. Decide and give priority to what is the most important thing as you proceed.

Attach deadlines to your goals. Without time lines, goals don't have much meaning. It gives a time when the goal should be measured to determine whether the objectives have been achieved. All goals that are set should have a time line attached so that you can measure and track your successes, and conversely, see where you might need to improve.

**Br. Tom C. J.

FROM THE CHIEF DESIGNER

Believe it or not, graphic design can boost employee morale, pride and productivity by creating a trusted and professional brand. I am MANOJ VERMA and I believe in the same as I am enjoying my job as a graphic designer nearly for the past six years. I started my journey as a Graphic designer when I was 19. It is a pleasure indeed for me spend my entire free time working on projects for friends, for institute or for my own entertainment.

My passion for graphic design began in 2017 when I took admission in DBTI. At the beginning it was just a training but later it really became a passion for me. I have been in DBTI since 2019 as a Graphic Designer faculty and it gives me immense joy and satisfaction to continue serving the young people. My strength is Adobe software but at the same time I explore for other softwares too.

My first experience was in Thomson Digital, Noida in 2017. Every designer dreams to work with this company however, I was getting the feeling that my creativity as getting replaced with routine work. So I made my shift to Aptara Int. Pvt. Ltd in 2018.

Aptara gave me an exposure to more challenging work which is a must need for every Graphic Designer. Aptara gave me an opportunity to work in a team of experienced and enthusiastic colleagues and seniors which further enhanced my working mind-set. Different platforms enrich you differently and so I made my move towards DBTI. Here I have changed my role from designer to faculty. My first batch started with a project under Godrej but soon due to COVID we had to stop all classes. For a short period of time I worked with iEnergizer as a senior analystist. But as it is said 'your roots will always call you, I got a call from Br. Tom, Principal of DBTI and again

I started my journey as an Instructor. I am still on this path of shaping our youth and moulding them to become fruitful individuals of society and with them I am also growing and learning the values under guidance of Don Bosco Family.

No one can deny that many great designers started out very humble. They became sponges and took it all in. They took notes and tried new things. They were receptive and grew because they listened to the people around them. There wasn't an attitude of pride or arrogance, but a conscious decision to be humble, to be teachable. This is what is expected of every aspiring graphic designer.

Director

REPUBLIC DAY CELEBRATIONS

The trainees of DBTI, Okhla celebrated 74th anniversary of the Republic day of India. This year, the theme of India's Republic Day 2023 is "Jan Bhagidari (participation of the common people)". The Constitution of India was adopted by the Constituent Assembly on 26th November, 1949, and came into effect on 26th January, 1950. This important day marks the transition of India from a British colony to a republic. The Republic Day of India is celebrated as national holiday throughout India. Our trainees were made aware through talks and sharing on the importance of the Republic Day of our country.

Training institutes, Schools, colleges and communities arrange programs where people participate and engage in several types of activities that commemorate the spirit of Republic Day. The national anthem is sung and the national tricolour flag is hoisted in honour of this patriotic day. The trainees had traditional march past after unfurling the national flag and national anthem. Arnold from machinist trade gave a lively talk explaining the importance of remembering and celebrating the Republic Day. Prior to this on 25th Lukman Siddique from Offset Printing course gave a passionate speech during the morning assembly. During the speech he pointed out the sacrifices made by our freedom fighters and he told everyone to be patriotic and stand for truth and justice.

Arnold David, Machinist II

DON BOSCO'S FEAST DAY CELEBRATIONS

Don Bosco's Feast Day was celebrated with great enthusiasm and gaiety by the trainees and staff of Don Bosco Technical Institute. On 30th There was a cultural program with dances, songs and other attractive presentations. The performers on the stage were incredible indeed. Fr. Ashok Kujur, the delegate for Social Communications, was the Chief Guest on the occasion and his speech touched up on the life of Don Bosco's struggles in life and how he had overcome all those difficulties from early age onwards. He very well connected the life of Don Bosco with the life of each youngster present in the hall. The trainees were overwhelmed after listening to Fr. Ashok. The dances on the stage by boys and girls mesmerized the entire audience. At the end of the program Br. Tom, the Principal was all appreciation for the performers. He thanked Fr. Abhay and team for the hard work put in to make the day a successful one. Everyone was given sweets at the end of the program which lasted about eighty minutes.

The celebrations continued on 31st January. The day began with Holy Mass in the chapel and Fr. Ashok was the main celebrant. He gave a talk during the mass and everyone was very attentive to the same as he gave some real life inputs which were connected to the life of Don Bosco. The chapel was houseful with teachers, Christian students, non-teaching staff and few students belonging other religions. After the mass there was a variety entertainment in the playground by way of different types of fun games; filling the bottles, bursting the balloons, fun games with rubber bands, tug of war, etc. There was so much of laughter and enjoyment during the fun games. Most of the games were new for the students and they actively participated. Teachers too joined the trainees and this added joy to the entire ambient. Fr. Abhay together with Mr. Sanjeet and few hostel boys planned the day's program and it was a fabulous day indeed. I am sure that everyone would cherish the day's entertainment for a long time. Lunch was served at 1.00 P M for all after which many stayed back for dancing in groups which they enjoyed to the full.

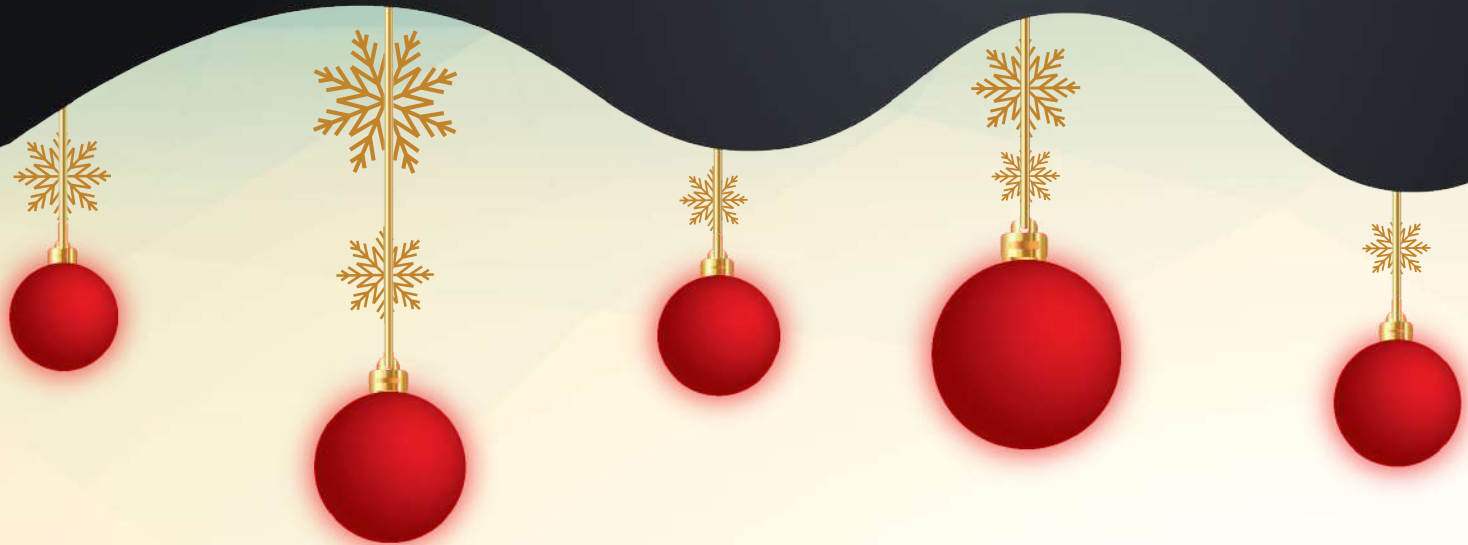

Activities, celebrations, fun games, stage entertainment, music, etc. are part and parcel of the growth of an individual. Don Bosco institutions give much importance to the holistic development of students by way of different activities as mentioned above. These allow you to assess the students as an individual, and

understand what they have achieved, and what they have not achieved, by looking at how the developmental areas link up and how progress in one area can affect progress in another area. I am sure these past three days of celebrations and activities including the quiz program on 28th January have taken the students on the whole to a higher level of thinking and understanding in the pursuit of a bright future.

Br. Jerom Bilung

CHRISTMAS CELEBRATIONS 2022

Christmas is a time of joy, peace and warmth bringing people together in an atmosphere of friendship and love. Christmas is indeed a universal festival and everyone celebrates the same one way or other. Christmas is said to be the most wonderful time of the year when people across the world come together to celebrate the birth of Jesus Christ. According to the Christians it is believed that God had sent his son on earth as a sacrifice to redeem the people of the world from their sins. It is not only the celebration of the birth of Jesus Christ but also the spirit of giving and affection celebrated across faiths. For Christians there is a spiritual preparation besides the external lighting and decorations.

The students of DBTI were very enthusiastic to celebrate the festival of Christmas and so the preparations had begun well in advance. The Christmas gathering of DBTI was held on 22nd December at 10:30 A.M. The students were told to come in casuals and this added to their joy and enthusiasm. Pratibha and Gerald anchored the program quite efficiently. The day's program begun with cutting of the Christmas cake by the principal followed by carol singing and the drama in which the announcement and arrival of the son of God on earth 2000 years ago was presented to everyone present. Br. Tom C. J, the principal in his message told everyone to have an attitude of sharing of joy and peace with family, relations, friends and neighbours. Fr. Sajan M George, the Director of the institute spoke on the occasion and he told everyone to be enthusiastic and happy and look forward to the new year with lot of hope and clear goals.

There was lottery organized for which coupons were already sold. Mr. Sanjeet and team took initiative to see to the details of the lottery. After the lottery, the Santa appeared for a few moments of dance and fun and everyone

enjoyed the presence of Santa. As soon as Santa left, there was a lucky dip in which everyone received something or other as gift. Everyone was given an institute calendar each as well as Christmas cake. A group of students stayed back for further fun and dancing after the program. Fr. Abhay Beck coordinated the entire program and the hostel boys gave all the necessary support in terms of decorations, crib and hall arrangements.

The past pupils of DBTI had a celebration Christmas at 2:30 on 18th December and over fifty past pupils were present besides a number of present pupils. The cultural events including carols, singing and a skit that depicted the event which lead to the arrival of Jesus on earth two thousand years ago. The alumni too sang carols towards the end and the program concluded by 5:00 P M with tea and Christmas cake.

The Christmas gathering of DBTI enriched the Christian trainees as well as the trainees of other religions as they got a fair idea of what the Christmas is. In fact, some had thought that Christmas meant the coming of Santa with gifts only. The trainees of other religions were enlightened on the importance and meaning of Christmas. Christmas season leading to the new year is a time when everyone feels happy and rejuvenated irrespective of religion or region. May the spirit of Christmas keep us all united in peace and joy and take us all to a new year with lots of hope and prosperity.

Mr. Vaman Kujur, Instructor, COPA.

DON BOSCO ITI PRINCIPALS' MEETING

Don Bosco Skills Mission, Bangalore

On 5th February 2022, the Principals of Don Bosco ITIs across the country had come together at Don Bosco Skills Mission, Bangalore for presentation of initiatives and activities. Quality time was spent together with lot of sharing and discussion on various useful topics pertaining to ITI training as well as other matters. 25 of the 29 Don Bosco training institutions(ITI) came together and it was coordinated by Fr. George Mathew, the Executive Director of Don Bosco Tech India. Fr. Davis M. J, the President of Don Bosco Tech India was also present on the occasion and made contributions by way of positive interventions.

The day's program began at 9:15 A M with a short prayer by Fr. Noble George after which Fr. George Mathew gave a briefing on the day's program. Br. Tom C. J, the convener of Don Bosco ITI consortium gave a short welcome speech in which he emphasized on the need of continuous accompaniment by Don Bosco Tech and a proactive and result oriented response from each of the ITI. This was followed by a presentation by Fr. Noble George on vocational skill training interventions. During this everyone had a better understanding of NSQF and NEP which were implemented recently (NSQF in 2013 and NEP in 2020).

Fr. George Mathew brought to the notice of everyone that very few were accessing the BOONFACE (Bosco Online Facilitation Center) and as a result Don Bosco Tech doesn't get training and other data from the training centers.

There was a presentation on modern welding by Lincoln Electric Welding school by Mr. Clifford. Later on in the afternoon Mr. Ravi Kumar presented and explained all the aspects of welding and the certification by India Institute of welding. Representatives from Japanese Chamber of Commerce too had come and gave a presentation on the possibility of jobs in Japan.

Fr. Davis M. J, the Provincial of New Delhi province, said that Don Bosco Tech together with the Salesians play a very important role in the lives of the poor young people across the county. There is a choice for the young people in our centers and many are being helped out. He also said that we all need to give the best for the poor without compromising.

At the end of the day Fr. Joseph Elevenal, the Director of DBSM concluded the day by giving a briefing of all that took place during the day. He expressed his gratitude to everyone for the active participation and valuable contribution.

Br. Tom C. J, Principal

QUIZ ON DON BOSCO & G20

Quiz competitions are conducted to reinvent the education system and give trainees a break from traditional classroom and lab learning. And technology can act as a facilitator by bringing innovation to quizzes and ensuring active participation among students. Today, quizzes are interactive platforms where students are not participating to take home a prize or get famous overnight, but to gain knowledge, seek opportunities to excel beyond academics and secure their future.

The trainees of DBTI Okhla, had the privilege of participating in an interactive quiz competition on 28th January 2023. One of the outstanding characteristics of the program was that the audience was able to participate in the quiz. There were 14 variety of quiz rounds and there were ten teams who actively participated. There were questions on Don Bosco, G20 summit, General Knowledge, Audio/video clips, Riddles, Rapid rounds, abbreviations, Buzzer round and other activity based questions.

The trainees were very alert and eager to gain more knowledge during the two and half hours of the quiz program. Br. Tom C. J, the Principal was the quiz master and he was assisted by Mr. Amit Gautam, Mr. Vaman, Mr. Sanjeet, Br. Jerom together with Ankur, Gerald, Anmol and Ashwit. The best team was Delhi Tigers representing Draughtsman first year and the participants were Prashant, Kartik and Jobin Ekka. Hearty congratulations to the team! There were two contestants for the second position; Boscos and Titanic II representing CVEGD second years and Machinist second years respectively. Third position went to the team Antivirus representing Graphic Design(1year). Kudos to the performers!

The atmosphere was electric during the entire duration of the quiz as everyone including the audience was eager to learn something more. The program has given quite a bit of additional knowledge especially on G 20 summit and Don Bosco. It was evident at the end of the program that everyone had a sense of joy and satisfaction of gaining something for life.

Mr. Sanjeet Kumar, Instructor, Graphic Design.

RECEIVED MORE THAN EXPECTED

It is a fact that life is sometimes unpredictable. Ups and downs are part and parcel of life even when we have trust in the almighty God. It is easy to trust in God when times are good but it is equally or more important to keep our trust in God when difficulties are faced. Life can be going along smoothly for a season. Your job is satisfying. Your friends and family are happy and supportive. Your goals, finances, health and outlook seem bright. In fact, this is what I am experiencing now after a long struggle at home.

I am writing this note with utmost pleasure and gratitude as I together with my brother, Mohammad Lui Ali, is working in a multi-national company in Gurugram. Looking back to our training at Don Bosco, it had eventually been amazing and both of us were fortunate to have had this opportunity. Apart from academics we learnt about the social part of our life. We have gained a lot from the morning assembly talks, orientation programs, competitions and many other activities during our training at Don Bosco Technical Institute. I was happy to have had friends from different parts of the country. Learning in such a diverse class of people from different states taught us the different perspectives. As future designers, it was necessary for us to know the different perspectives and people's needs. This difference in culture and social background helped us to have a firm foundation for a better life which we are experiencing today.

As I already mentioned apart from our rigorous course we had the opportunity to participate in different sports events which were conducted in our institute. My brother, me and Sandeep Minj were the three candidates to secure a job as graduate trainees of design at JLL (Jones Lang LaSalle), Gurugram and it is world's second largest real estate firm. I am happy indeed to say that Don Bosco gives the platform for its trainees to job placement as well and this was the first time that JLL had come for a campus placement and we were fortunate to secure the job. This is our first job with an annual salary of 4.5 lakh and we are glad that we had the opportunity to get trained in Don Bosco. To tell you frankly, Don Bosco gave us more than what we expected in terms of knowledge and skill together with a holistic growth which made us what we are today. We shall always be ready to mentor our juniors in the institute. We are eternally grateful to the almighty for the blessings and deeply indebted to Don Bosco for the quality inputs that we had received during the training.

-Mohammad Ribi Ali, A student of Graphic Design 2021-22, DBTI Okhla

I AM ON THE TOP

I am Nirali, pursuing COPA (Computer Operator and Programming Assistant) from Don Bosco Technical Institute, Okhla. It has been more than six months since I joined Don Bosco and have been learning a lot over here. All the fathers, brothers, teachers and classmates are very supportive and cooperative towards my educational growth.

I would like to recall with gratitude how I came to know DBTI. I had already planned to do a computer course but did not know where and how to go about. I searched and consulted many people with regard to this course. Meanwhile I was told about Don Bosco Technical Institute by one of my relatives who had done his studies from here. Thus I enquired about this prestigious institute and found that it was better than any other institutes in Delhi. Finally, I decided to join Don Bosco Technical institute at Okhla. I am extremely grateful to my relative who suggested me to do the course over here.

Discipline is the first thing that is taught to us here for our welfare. Don Bosco Institute has a set of rules and regulations which make us more disciplined, responsible and well-mannered persons. In the beginning I did not like the rules and regulations as we had to stand in line for the morning assembly and other places as well but as the days passed I realized the value of disciplined way of life. Here lot of knowledge, skills and values is imparted to the students. During morning assemblies lot of information and values are shared with the students. Students are also given chance to give morning assembly talks. Life skill classes also add value to our quality of life. I am convinced and do believe that these values would help me and all my friends to become persons of great caliber.

We are taught to manage our time effectively and that enables us to become more confident, organized and efficient. The Institute always insists on punctuality and that helps us to be more effective and professional. Wearing the uniform is mandatory in the institute and I did not like initially but I realized that we are learning here to make ourselves presentable. This institute demands on hundred percent attendance and so most of the students are regular for the classes. This regularity helps us to be self-disciplined and target oriented.

Over all my experiences in these last six months has been enriching, motivating and future oriented. I learn not only computer subjects but also time management, moral values and self-discipline. After having come here my perspectives towards myself and society have changed. My standard of speaking and writing English has improved as I am coming from a government school. I am extremely happy about my performance in the class as I have topped in the second assessment and I hope to maintain my standard in the future as well.

Along with the academic subjects extra co-curricular activities are given importance over here and I make use of all these opportunities to shape my life. I am glad to say that I got second position in badminton and my team was first in throw ball tournaments. Thus I have been learning lot of things over here. The institute gives equal opportunities to every student. This is the place where I have been recognized and acknowledged and my individuality and uniqueness are nurtured. I am grateful to the management for providing such opportunities which made me competent and confident.

NIRALI TOPPO, COPA, 2022-23

PARENTS & TEACHERS MEETING

Parent-teacher meeting is one of the effective tools which improves the overall performance of the students. Almost all the schools, colleges and institutes consider it important as it has a very positive outcome. It is not only on academic but non-academic activities are also taken in to consideration while interacting with the parents.

The institute had its second quarterly examinations in the second week of February and the date fixed for PTM was 25th February. The mechanical and computer sections were allotted the second floor and the printing & graphic design sections were allotted the third floor of the building for PTM. It was heartening to see that almost all the students' either parents or guardians came for the PTM. It was a mutually enriching experience. Some parents were able to point out some areas where the teacher's attention needed to be concentrated. Similarly, the teachers were able to tell the parents regarding some students who had issues to cope with the studies. Some students did really well and they were appreciated for the same. Many parents came and met the principal and those who did well were appreciated for the effort made. While those performed badly were suggested with ways and means to improve. I am sure this face to face communication of parents and teachers will play a vital role in their child's learning process in the coming months. During the PTM, it was evident that the role of both parents and teachers were mutually clear, specified and designed in such a way that it would bring the best in the student's performance as he proceeds with his learning process.

Those students whose parents were far away had the opportunity for online PTM and the parents concerned were happy. Practically all came in the first half itself and there was a sense of satisfaction on the face of teachers that they could meet and interact with the parents. I can say confidently at the end of the day that there is a positive outcome and now on the students will be able to concentrate better as they will be focussing on the completion of their training at the end of the training year.

Br. Tom C. J, Principal

PTM

JUST FOR YOU

What are the three God riddles?

1. Three God's A,B and C are called, in some order, True, False, and Random.
2. True always speaks truly, false always speaks falsely,
3. but whether Random speaks truly nor falsely is a completely random matter.

Palindrome

1. Borrow or rob?
2. Draw, o coward!
3. Mr. Owl ate my metal worm.
4. Do geese see God?
5. Racecar
6. level
7. Madam
8. Aibohphobia

Clover Tongue

This is the most difficult type of tongue-twisting, where the person folds forming a clover-leaf shape. Some people with this ability can create three bends, while there are others who can even create four bends.

Tongue Twister

1. Six sick hicks nick six slick bricks with pricks and sticks.
2. Swiss wrist watches. "Which wrist watches are Swiss wrist watches?"
3. Betty bought a bit of butter. But the butter Betty bought was bitter, so Betty bought a better butter than the butter Betty bought before.
4. How much wood would a woodchuck chuck if a woodchuck could chuck wood?
5. 'Brisk brave brigadiers brandished broad bright blades, blunderbusses, and bludgeons-balancing them badly.'

ADVENTUROUS DAY AT ISLAND

Many schools, colleges and institutes incorporate team building activities into the system to strengthen relationships and encourage staff to foster creativity. Team outings are important because they allow staff members to connect in different ways than they usually would. These activities help staff improve their performance, strengthen their relationships and get them into the right frame of mind to move on with the teaching and other activities together.

Few days back, Br. Tom, our Principal told all the staff to decide a spot for picnic. So this time we thought something out of the box and decided to visit an amusement park. A number of places came to our mind, but the first one was Adventure Island. We decided to go on a weekday, 23rd February, 2023 (Thursday) to avoid possible rush. Adventure Island is located in Rohini just near the Rithala Metro Station.

We reached venue around eleven o'clock in the morning and clicking group photos in front of the Island entrance was the first thing we did. Then we took the entry ticket to the Adventure Island. After the entry the first place is the **Metro Walk Mall** – This mall was the first type of an “**Open Mall**” in Delhi. Roaming around in the mall in fresh air was simply awesome.

After that there is a giant bridge that separates the Island from the Metro Walk Mall area; So you walk over the bridge and enter into Amusement Park. That Bridge was a spotlight area and we took many group photos at the giant bridge. After entering the amusement park we decided to enjoy every moment to its fullest. The amusement park was very beautifully maintained and contains many rides and attractions. One by one we experienced each and every ride and we utilized the dance platforms of the island to its fullest with our breathtaking dance moves. Our favorite ride was “**The Side Winder**” – It twirls and throws you up into the air, almost vertical which makes you feel something like you're helpless in the air. After enjoying the ambience and rides for almost 3 hours, we decided to have lunch at Pind Balluchi Restaurant. As someone said food tastes even more delicious when you're hungry and this statement was perfectly apt for us at that time.

Afterwards we relaxed for a while and had group discussions related to new projects and programs of our institute. Then around four o'clock in the evening we decided to wind up our thrilling outing. I would like to thank Br. Tom our Principal for organizing such a wonderful outing and I will consider this day as an “**Adventurous day at Island**”.

Mr. Anto Peter, COPA Instructor

ADVENTURE ISLAND

INDUSTRIAL VISIT TO SMS GROUP INDIA

Exposure visit to an industry is part of the training program of trainees. Trainees profit immensely from this type of visits because it enhances the practical aspects of the training program. An industrial visit in fact changes the perspective of a trainee.

The trainees of Draughtsman from DBTI were privileged to visit on 17th March, SMS Group which was established in 1871. The group made its opening in India in 1952. We were accompanied by Sonam Ma'am and Deepak Saini Sir. Our visit to the company was from 12.30 PM to 4.30 PM. As we reached the spot, a warm welcome was given to us by the people responsible from the company and we all felt very happy indeed. The company provided us with lunch and after which manager of two different departments gave us an overview of the company with a power point presentation. Soon after that we had time to spend time with the designers of the company and it was a pleasure interacting with them. We met some off the employees too and one of them was one of the past pupils of DBTI.

The visit was an enriching experience for all of us. We came to know more about the company and its functioning. Now we have a better knowledge on designing and it applications. We express our gratitude to Sonam Ma'am, the project coordinator cum facilitator and Latika Ma'am, the project manager. We are also thankful to Br. Tom C. J our principal and Mr. Deepak Saini Sir for giving us all the necessary support and encouragement.

**For Draughtsman trainees
Melvin Wilson**

A SESSION ON ANIMAL WELFARE

Animal welfare refers to the quality of life experienced by an animal in its own environment. Animal welfare is affected by the relationships human beings have with animals and it is our duty to ensure all animals are treated humanely, responsibly, and with respect. To have a better understanding of the subject, Members of the Animal welfare association from Noida gave an input session on the same to the trainees of Don Bosco Technical Institute, Okhla at 2:30 P M on 18th February 2023.

The trainees and staff were privileged to have the group from Noida who highlighted the danger that cruelty to animals poses threat to the society. Animal abuse in fact gradually leads to human abuse and cruelty. Mrs. Ambika Shukla, director, Sanjay Gandhi Animal Care Centre while taking the session said that in Turkey, animals were saving humans as scores of dogs had been roped in for disaster management. Two student volunteers also shared their experience in taking care of the welfare of animals. At the end of the program it was proposed to start a kindness club in the institute. The response was heartening with many

Students showing interest. The students even took a pledge to protect animals. The session also pointed out how different animals play an important role in the ecosystem.

Animal Protection has a multi-pronged approach to improving the lives of animals. It is important to create an awareness regarding the protection animals in the wild, creation a better quality of life for animals in farming, rescue of animals in disasters and assisting animals in communities.

There is a need for a robust animal welfare policies ending the use of wild animals for entertainment and the exotic pet. Animal welfare is important because there are so many animals around the world suffering from being used for entertainment, food, medicine, fashion, scientific advancement, and as exotic pets.

The Principal expressed his gratitude to the members of the welfare association for taking the initiative to educate the students on the welfare of animals. Mr. Sanjay Mohapatra took lead in organizing the program. The staff and students expressed satisfaction with the input received. The session ended at 4.00 P M with tea and snacks for everyone.

VISIT OF THE VICAR OF THE RECTOR MAJOR

The management staff and students of DBTI Okhla were privileged and honoured to have the presence of Rev. Fr. Martoglio Stefano, the Vicar of the Rector Major from Rome. He arrived at Don Bosco Okhla at 5:00 P M on 25th February. He was welcomed by Fr. Provincial and Br. Hermon Lakra at the airport. At 9:00 A M he came over to the institute to meet the staff and students. Br. Tom, the Principal, on behalf of the institute welcomed him in the assembly. He together with Fr. Provincial and Fr. Saimy were welcomed with bouquets of flowers after which the hostel boys sang a beautiful welcome song. Fr. Stefano addressed the students and he said the they all belonged to a huge family and so encouraged them to be happy and do well in their career. He paid a visit to the printing press first and then he moved around to see the training facilities of ITI and other sections. He saw the college library which is spacious and well arranged. He had coffee and snacks with the Salesians after which he left the institute. He was appreciative of all the training programs and the training facilities of the institute. Fr. Stefano's presence and words of encouragement were a source of support and inspiration for all of us in the institute.

The fact that International Women's Day is celebrated on March 8th of every year across the world, is strongly linked to the women's movements during the Russian Revolution (1917). But as early as 1900 itself equality and women empowerment were already talked about. Don Bosco Technical Institute celebrated Women's Day on March 7th 2023 as 8th March was a holiday due to the Holi festival. The girls were in colourful dress and took the initiative to put up a short and at the same time entertaining cultural program during the morning assembly. The celebration began with a beautiful and thoughtful prayer service by Manisha. The entire program was hosted by Akanksha and Manisha of CVE GD 2nd Year.

A Nukkad Natak on the topic "Women's Empowerment" (Narishakti) was enacted which conveyed an inspiring message to the women of this generation to be women of courage, compassion and care at the same time not forgetting to be self-reliant and Independent women. It was also pointed out that gender inequality and discrimination are rampant in our societies, and most of the time women are victims of them. It is important to fight these gender biases and bring to the attention of all, issues such as gender equality, reproductive rights, and violence and abuse against women.

Moving forward, a dance was performed by a group of girls which mesmerized the eyes of the audience. After that Shipra, student of COPA, presented a speech which highlighted the significance of the day. She described the plight of women at present through an elaborated speech where she also pointed out the rights of women and the importance of women in the present day society. She also emphasized that in the 21st Century the world is slowly moving towards equality for both men and women which could include equal pay scale, social status and equal voting right for women. Women are always a source of inspiration for the family and society. Shipra ended her speech by saying, "So support every woman around you and respect everything they do for the welfare of the family and society because they deserve acknowledgement and appreciation."

At the end of the program gifts were distributed to each girl and all the students were given chocolates to sweeten their mouths. The girls were given permission to be in casual dress the entire day and they were very happy indeed. I am sure they shall cherish the memories of the same as they got motivated and inspired on this particular day when the whole world was celebrating women's day.

Ms. Nitu Xalxo, Teacher, Graphic design.

VISIT OF THE PROVINCIAL SUPERIOR

Planning, monitoring and evaluation is a powerful tool for understanding and improving the effectiveness and efficiency of any organisation's activities and programs. Keeping this in mind Fr. Davis M. J, the provincial superior of New Delhi Province, came on 10th March 2023 for a three-day visit to Don Bosco Technical Institute. He was warmly welcomed by the institute during the morning assembly. Br. Tom,

the principal welcomed him and had words of appreciation on the occasion of the annual visit of the superior. The students sang a welcome song after which the provincial addressed the trainees. He told them to concentrate on the step they had taken so that after the training they could get good jobs to support their own families and live a dignified life in the society.

Fr. Provincial met the Salesian fathers and brothers together and gave a briefing of the purpose of the visitation and asked each sector to submit a brief report. In the afternoon he met the staff of the mechanical workshop and printing press. The following day he met the teaching staff of the technical institute and the college as well as the non-teaching staff separately. He had words of appreciation for the staff for the hard work being put in for the betterment of the institute. He had special emphasis on the need for taking care of the poor in our institute.

Fr. Provincial visited the different sections of the institute, the class room facilities and the labs as well. He was appreciative of the amount of work being done in the campus. He met the Salesians individually as well as in groups to get an overall understanding of the activities that are going on. The visitation concluded at 12:30 P M on 12th March.

This visit has helped us to come out with a positive approach, make better planning and increase efficiency so as to serve the youth better. Definitely it has helped us to understand our strengths and weaknesses, identify trends over time and measure progress. We believe that regular monitoring and evaluation can identify areas for improvements as we move ahead with planning and execution of programs and activities.

A COLLABORATIVE PROJECT TO BUILD THE WORKFORCE

“COMING TOGETHER IS A BEGINNING, STAYING TOGETHER IS PROGRESS, AND WORKING TOGETHER IS SUCCESS.” HENRY FORD

Collaboration is the premise of Project ANVIT, implemented by ETASHA Society. [ETASHA Society](#) has been skilling communities for sustained employment, livelihood and income generation for close to 2 decades. This is in collaboration with Don Bosco Technical Institute, Okhla and funded by SMS GROUP who will also play the role of a recruiter.

The objectives of project ANVIT is to make the final year students of Draftsman Mechanical Trade employable and ready for the organized sector companies, one of which is SMS Group.

Since December 2022, we had a team of technical and employability skill trainers who constantly marked trainees' development growth and feedback throughout the sessions. We were able to comprehend their clarity and application of the concepts on the basis of their learnings from the workshops. The participatory and experiential methodology kept the students interested throughout the course. They did a fantastic job throughout the technical session and truly loved learning new tools like AutoCAD, Solidworks, and Creo, which will enable them to meet the demands of the modern industry. They are currently working on projects, which is a great approach to let the trainees collaborate and put their lessons into practice. They will have projects for a three-cylinder radial steam engine and a single-cylinder horizontal internal combustion engine available.

Latika, Project Manager, " In my more than 8 years of training youth, I haven't encountered a group of boys who are this disciplined !! They are aspirational and have definite plans for the future. Most of the boys belong to places like Rishikesh, Dehradun, Kerala etc. and those who are from Delhi travel every day to Don Bosco Technical Institute, Okhla, to learn with enthusiasm. They couldn't wait to meet the SMS Group, one of their potential recruiters. They bombarded the HR with questions during their first meet and displayed considerable eagerness to work as draughtsman designers for the SMS Group. Their involvement in skills competitions and sharing of their learnings in WhatsApp groups show how eager they are to learn. I wish them best of luck in the future."

Sonam, Project Coordinator cum facilitator shares, “My experience with Don Bosco was rich in learning opportunities. I observed that the trainees’ participation was positive, as their minds were eager to learn more about the program and session. This kind of a collaboration is sustainable and will help both the recruiters and the students.”

“As a technical person, I was always meeting different students to train them in software and prepare them for job opportunities. This is my first social project with ETASHA Society and my experience so far has been fantastic. When I first began conducting sessions with Don Bosco Trainees, I noticed that the trainees were eager to learn and willing to give all their efforts in technical sessions. I was inspired by their dedication.”

Vikas, CAD Trainer

We wish all the very best to the students for their bright future and do hope we can work with more such institutions to build the workforce for the modern industry. For collaboration do get in touch with us at etasha@etashasociety.org

Convocation Day

ABOUT US

Don Bosco Technical Institute is a placement driven and skill training Institute. It is a Christian minority Institute established in 1971 and is owned by Don Bosco Group. Don Bosco Group is spread across 134 countries having thousands of training institutes world-wide and over 125 locations in India catering to skilling and employability needs of the youth.

SELECTION PROCESS

Candidate must appear for Test/Counselling and interview with the parents. Final shortlist is based on counselling, interview and scores from class X and XII.

- Limited hostel facility is available for Catholic boys.
- Hostel facility is available for Girls Outside the Institute Campus.

AFFILIATED TO

NCVET, (National Council For Vocational Education And Training)

Council For Indian School Certificate, Sector Skill Council, NIELIT and Guru Gobind Singh Indraprastha University

Students who are admitted to formal courses are not allowed to enroll in any other studies during their training period.

APPLICATION PROCESS

Prospectus & Application Form can be obtained from the institute on payment of Rs. 500/-

(From 2nd May 2023 to 28th June 2023 between 09:30 AM - 04:00 PM.)

Application form can be submitted online and also be downloaded from **www.donboscotechdelhi.in**

Send DD for Rs. 500/- in favour of **Don Bosco Technical Institute**, if the application is submitted by post.

Application form along with the attested copy of the required documents should reach institute before **28th July 2023**.

The institute is not responsible for any postal delay.

ADMISSION 2023 - 2024

Issue of Form

02nd May 2023 to 28th June 2023

Application Submission Deadline

28th June 2023

Counselling & Interview

04th - 06th July 2023

Interview Result **10th July 2023**

Registration **12th July to 27th July 2023**
